

AMERICAN RECOVERY AND REINVESTMENT ACT

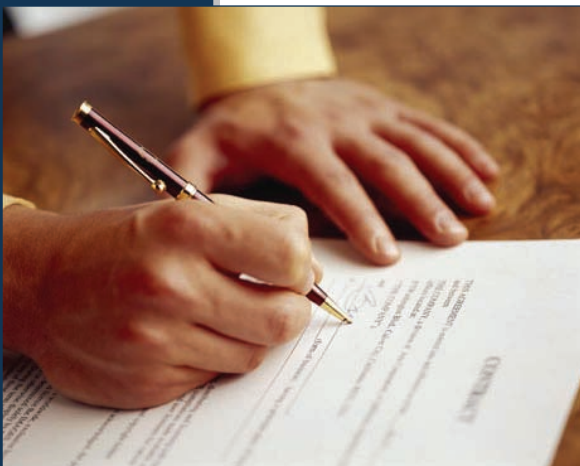

YRCI is:

- An expert in acquisition, contracts, and grants management
- Currently helping the GSA, USDA, and NIST with Recovery Act contracting and grants
- A company with proven federal past performance
- Your partner for Recovery Act surge support
- A team with a renowned staffing and recruiting capability
- Serving federal customers across the US

How much is the *Recovery Act* going to *overburden* your acquisition, contracts, and grants management *workforce*?

The Recovery Act leads to an exponential increase in work for planning, awarding, and administering contracts and grants tied to stimulus money. To prepare for the rapid surge these efforts will bring, departments and agencies require a workforce augmentation in a timeframe that the federal hiring cycle simply cannot accommodate. Departments and agencies need a trusted partner they can rely on to bolster their acquisition, contracts, and grants management function.

YRCI already supports Recovery Act contracting and grants for the General Services Administration (GSA), U.S. Department of Agriculture (USDA), and the National Institute of Standards and Technology (NIST). With many years of experience helping federal clients achieve success and an unmatched database of acquisition, contracts, and grants management professionals, YRCI CM&P is uniquely positioned to answer your workforce shortage. With acquisition-specific GSA Mission Oriented Business Integrated Services (MOBIS) and Temporary Administrative and Professional Staffing (TAPS) schedules, YRCI CM&P offers a variety of methods for you to procure acquisition, contracts, and grants management support on flexible terms at fair and competitive rates.
